

"The Luminaire of the Year"

Dear customers,

vote for the "**Luminaire of the Year**" 2022:

Arditi GmbH is participating for the first time with a product which is obviously not recognisable as a luminaire!

Nevertheless, our illuminated control element **LEPUK** was included in the voting, because the user can have a new experience with use of the luminaire: an intuitively accessible light atmosphere.

You don't know the **LEPUK** yet?

It's THE remote control for four-channel applications: touch to dim the ball cap and change the channel by tilting.

The LEPUK is available in **9 different variants:**

Choose between oak, mahogany and cherry wood, as well as the metal cap in black, silver and gold.

The LEPUK has a diameter of 73 x 62 mm and fits comfortably in the hand.

The LEPUK - an intuitive remote touch dim with CASAMBI - convince yourself!

The Light & Building 2022 is over -
thank you for your visit!

It was a lot of fun and always an interesting experience.

Arditi GmbH with its mother company Arditi SpA from Italy has been able to present a modern booth with many new products.

Those who visited us were also able to see the **LEPUK** in action and test it out for themselves.

Do you have any questions? Feel free to contact us at info@arditi.de and you will receive the best support for your project!

Many thanks to Mr. Ole Noculak and Mr. Volker Kamp from LEDIM for the great cooperation and collaboration regarding the LEPUK and the support at the Light & Building 2022.

The design of the LEPUK is made by LEDIM.
