XMoment –
the first Casambi voice control

The XMoment works as a gateway between Casambi and Alexa and is connected via Wifi with your Alexa device.

Scenes can be controlled in the Casambi network without any problems.

4 - 20 voice commands can be put down depending on the version. These individual commands can also be dimmed.

A complicated wiring is not necessary, only a power supply is required.

Part no. for 4 voice commands: 808861
Part no. for 16 voice commands: 808866
Part no. for 20 voice commands: 808771

The Motion Paul –
an intelligent motion detector with integrated daylight sensor

An accessory for your smart CASAMBI network: connect the Paul motion sensor to your system via CASAMBI app and your CASAMBI lights or systems will automatically turn on when you enter an area or room.

Easy mounting via magnet, the motion Paul sensor can be mounted anywhere.
Extremely fast response time of less than 0.2s with a range of 12 meters and a radius of 8 meters.

The sensor only reacts when there is not enough daylight and is therefore extremely energy-efficient (adjustable).
